🌐 Portfolio

Profile

Final-year AI and Data Engineering student with a core focus on Deep Learning applications and AI pipeline optimization. Passionate about building robust AI infrastructure and deploying scalable, intelligent models. Seeking a 4 to 6-month Graduation Thesis Internship (PFE) at Oracle to contribute to high-impact AI technology projects.

Education

Data Engineering Cycle ENSA El Hoceima	2024 – Present
Integrated Preparatory Classes ENSA El Hoceima	2022 – 2024
Computer Engineering Higher School of Technology of Casablanca	2021 – 2022
Baccalaureate in Physical Sciences	2020 – 2021

Professional Experience

OCP Group Jorf Lasfar, El Jadida	July 2025
Data Scientist Intern	

- Built an end-to-end employee attrition prediction system: data cleaning, feature engineering, and encoding on the IBM HR Analytics dataset.
- Trained and compared Logistic Regression and Random Forest classifiers; selected the best model based on accuracy, precision, recall, and F1-score.
- Applied KMeans clustering to segment employees into risk groups, enabling targeted retention strategies.
- Developed an interactive Streamlit dashboard for real-time attrition prediction and workforce analytics visualization.

Projects

JOB INTELLIGENT | CANDIDATE-JOB MATCHING ENGINE

- Leveraged **Gemini 1.5 Flash** for intelligent CV parsing: automated extraction and structuring of complex candidate data from raw resumes.
- Built a semantic matching engine using **BERT** embeddings and **FAISS** (Facebook AI Similarity Search) for high-accuracy candidate-to-job recommendation.
- Orchestrated an end-to-end data pipeline with **Apache Airflow** and **Scrapy** for automated ingestion of job postings from LinkedIn, Indeed, Google Jobs, and France Travail.
- Served the AI-powered platform via a **FastAPI** RESTful API backed by PostgreSQL.

TAASIM | URBAN MOBILITY PLATFORM

- Built an AI demand forecasting pipeline using **PySpark MLlib (GBTRegressor)**: engineered temporal, spatial, weather, and lag features over historical taxi data; outperformed naive baselines on RMSE and MAE.
- Designed a real-time Kappa Architecture with **Apache Kafka**, **Apache Flink** stream processing (event-time watermarks, tumbling-window aggregation, stateful trip matching), and Cassandra serving layer.
- Served the trained **GBT model** via a JWT-authenticated **FastAPI** endpoint; built a Grafana dashboard with real-time heatmaps and ML forecast panels.

REAL-TIME WEAPON DETECTION

- Designed a custom deep learning detection pipeline combining **YOLOv11/v12** backbone with a **Swin Transformer** neck for long-range spatial dependencies, significantly improving accuracy on complex scenes.
- Integrated **SAHI** (Slicing Aided Hyper Inference) for reliable small-object detection in high-resolution video streams with a dual-cadence inference engine.
- Applied **Grad-CAM** heatmaps for model explainability (XAI); implemented **GIoU**-based proximity alerting with temporal persistence filtering to eliminate false positives.
- Built a React dashboard with live **WebSocket** video streaming and threat event history, served by a **FastAPI** backend.

COLLABORATIVE NLP ANNOTATION PLATFORM

- Fine-tuned state-of-the-art **Transformer** models for text classification using **Hugging Face** ecosystem, ingesting crowd-sourced annotated datasets.
- Architected a collaborative data-labeling platform with automated arbitrage algorithms to ensure high-quality ground-truth labels for downstream **NLP** and **Machine Learning** workflows.

Certifications

- **Oracle Cloud Infrastructure:** 2025 Certified Data Science Professional.
- **Oracle Certified Professional:** Java SE 17 Developer & Cloud Database Services 2025.
- **Oracle Cloud Infrastructure:** 2025 Certified AI Foundations Associate.
- **365 Data Science:** Deep Learning with TensorFlow 2.
- **DataCamp:** Associate Data Engineer.
- **365 Data Science:** LLM Engineering.

Technical Skills

Cloud & Oracle:	Oracle Cloud Infrastructure (OCI), OCI AI Services, Object Storage, Streaming, Docker, Linux (Ubuntu)
Big Data & Databases:	Spark, Flink, Kafka, Hadoop, PostgreSQL, MySQL, MariaDB, MongoDB, Cassandra, Airflow
AI & Data Science:	Machine Learning, Deep Learning, TensorFlow, PyTorch, Hugging Face, FAISS, NLP, RAG, LLMs, Pandas, NumPy
Programming & Web:	Python, Java 17 (Spring Boot), FastAPI, React, C
DevOps & Tools:	Git/Github, Maven, Docker, n8n, Scrum, RESTful APIs

Languages

Arabic: Native **French:** Professional Proficiency **English:** Professional Proficiency

Soft Skills

- | | |
