Profile

Second-year AI and Data Engineering student with a core focus on Deep Learning applications and AI pipeline optimization. Passionate about building robust AI infrastructure and deploying scalable, intelligent models. Seeking PFA internship to contribute to high-impact AI technology projects.

Education

Data Engineering Cycle ENSA El Hoceima	2024 – Present
Integrated Preparatory Classes ENSA El Hoceima	2022 – 2024
Computer Engineering Higher School of Technology of Casablanca	2021 – 2022
Baccalaureate in Physical Sciences	2020 – 2021

Professional Experience

OCP Group | Jorf Lasfar, El Jadida July 2025
Data Scientist Intern

- Built an end-to-end employee attrition prediction system: data cleaning, feature engineering, and encoding on the IBM HR Analytics dataset.
- Trained and compared Logistic Regression and Random Forest classifiers; selected the best model based on accuracy, precision, recall, and F1-score.
- Applied KMeans clustering to segment employees into risk groups, enabling targeted retention strategies.
- Developed an interactive Streamlit dashboard for real-time attrition prediction and workforce analytics visualization.

Projects

JOB INTELLIGENT | CANDIDATE-JOB MATCHING ENGINE

- Used **Gemini 1.5 Flash** for intelligent CV parsing and **BERT + FAISS** for semantic candidate-to-job matching.
- Automated job ingestion from LinkedIn, Indeed, Google Jobs via **Apache Airflow** and **Scrapy**.
- Served the platform via a **FastAPI** RESTful API backed by PostgreSQL.

TAASIM | URBAN MOBILITY PLATFORM

- Built a demand forecasting pipeline with **PySpark MLlib (GBTRegressor)** on historical taxi trajectory data.
- Designed a real-time Kappa Architecture using **Apache Kafka**, **Apache Flink**, and **Cassandra**.
- Served the trained model via a JWT-authenticated **FastAPI** endpoint with a Grafana ML dashboard.

REAL-TIME WEAPON DETECTION

- Built a detection pipeline combining **YOLOv11/v12** with a **Swin Transformer** neck and **SAHI** for small-object detection.
- Applied **Grad-CAM** for model explainability and **GIoU**-based proximity alerting to reduce false positives.
- Delivered a React + **FastAPI** dashboard with live WebSocket video streaming and threat event history.

COLLABORATIVE NLP ANNOTATION PLATFORM

- Fine-tuned **Transformer** models for text classification using the **Hugging Face** ecosystem on crowd-sourced annotated data.
- Built a collaborative labeling platform with automated arbitrage for high-quality **NLP** ground-truth datasets.

Certifications

- **Oracle Cloud Infrastructure:** 2025 Certified Data Science Professional.
- **Oracle Certified Professional:** Java SE 17 Developer & Cloud Database Services 2025.
- **Oracle Cloud Infrastructure:** 2025 Certified AI Foundations Associate.
- **365 Data Science:** Deep Learning with TensorFlow 2.

- **DataCamp:** Associate Data Engineer.
- **365 Data Science:** LLM Engineering.

Technical Skills

Cloud & Oracle:	Oracle Cloud Infrastructure (OCI), OCI AI Services, Object Storage, Streaming, Docker, Linux (Ubuntu)
Big Data & Databases:	Spark, Flink, Kafka, Hadoop, PostgreSQL, MySQL, MariaDB, MongoDB, Cassandra, Airflow
AI & Data Science:	Machine Learning, Deep Learning, TensorFlow, PyTorch, Hugging Face, FAISS, NLP, RAG, LLMs, Pandas, NumPy
Programming & Web:	Python, Java 17 (Spring Boot), FastAPI, React, C
DevOps & Tools:	Git/Github, Maven, Docker, n8n, Scrum, RESTful APIs

Languages

Arabic: Native	French: Professional Proficiency	English: Professional Proficiency
----------------	----------------------------------	-----------------------------------

Soft Skills
